

The point charging bar R23ATR is used wherever target-specific electrostatic charges need to be applied even at high temperatures. For instance in edge trim adhesion in flat film production. Using the point charging bars R23ATR, both outer edge zones of the film are fixed directly downstream from the flat film extrusion die to prevent neck-in.

The point charging bar R23ATR can be operated with one, two or three emission tips. The tips are interchangeable. The geometry of the tips is adjustable depending on application. This means that the point charging bar R23ATR may be used horizontally or vertically even in confined spaces.

Technical Information

F00028y

R23ATR Point Charging Bar

TI-en-3021-0804

electrostatic
innovations

Design options of the charging bar

R23ATR0

Point charging bar without emission tip, tips must be ordered separately

R23ATR1

Point charging bar with 1 emission tip 100294

R23ATR2

Point charging bar with 2 emission tips 100294

R23ATR3

Point charging bar with 3 emission tips 100294

R23ATR11

Slim point charging bar with 1 emission tip 100294

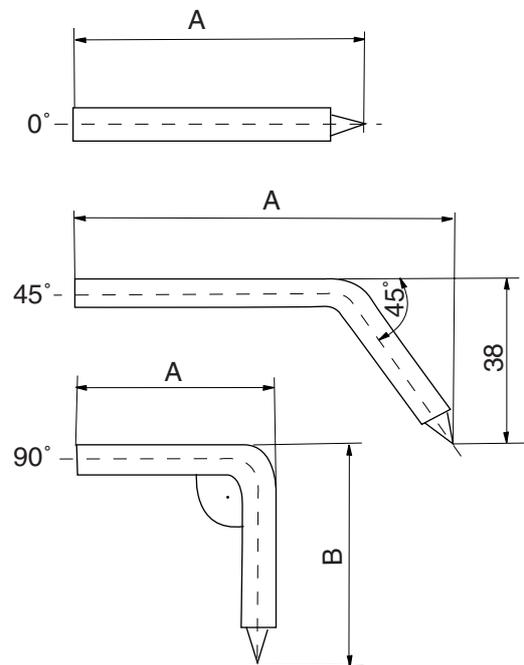

Technical specifications

Electrode element	PU, UL 94 V-0
Emission tips	R23ATR: max. 3 emission tips R23ATR11: 1 emission tip exchangeable, adjustable, with insulating coating, current limited
Ambient operating temperature	0...+120°C (+32...+248°F) in emission tip area 0...+70°C (+32...+158°F) on electrode element
Dimensions	see figure
Operating voltage	30 kV DC max.
High voltage power supply	via Eltex high voltage generators series KNH34 and KNH35
High voltage cable	prefabricated, exchangeable high voltage cable in plastic tubing with connector for charging bar and high voltage generator, high voltage cable must be ordered separately, specify cable length and power supply

Overview emission tips
