

FLASHING LIGHT 10 J

Quadro F12-SIL

Integrated safety in sturdy Quadro-Design.

- To signal dangerous situations in safety-relevant application such as process and plant safety, e.g.
 - leaks/gas warning, high-pressure/overflowing
 - and machine safety, e.g. as
 - start-up warning, muting indication, machine stop delay warning
- By means of integrated self-monitoring of the devices the normative required, regular inspection of warning devices is ensured.
- The warning devices can be implemented in Safety Instrumented Systems (SIS) up to **SIL 2/PLd**.

We would be more than happy to provide all safety-technical key data.

CONFORMITY TO STANDARDS

The visual characteristics of flashing lights conform to the European standard DIN EN 842; “Machine safety – visual alarm signals”. Requirements contained in the DIN EN 981 standard; “Machine safety – system of acoustic and visual alarm and information signals”, can be fulfilled.

The colours “red” for the emergency signal and “yellow” for the warning signal conform to the requirements of IEC 73 / DIN EN 60073 / VDE 0199; “Coding of display devices and control elements using colours and supplementary means”.

The visual alarms fulfill the requirements to the functional safety according to:

EN 61508 Functional safety of electrical/electronic/programmable electronic safety-related systems

EN 61511 Functional safety - Safety instrumented systems for the process industry sector

The devices can be used in safety related control systems in accordance with the following standards:

EN ISO 13849-1 Safety of machinery – Safety related parts of control systems – part 1

EN 62061 Safety of machinery – Functional safety of electrical/electronic/programmable electronic safety-related systems
